

Edits V3

Notes- The system footers don't match the navbar

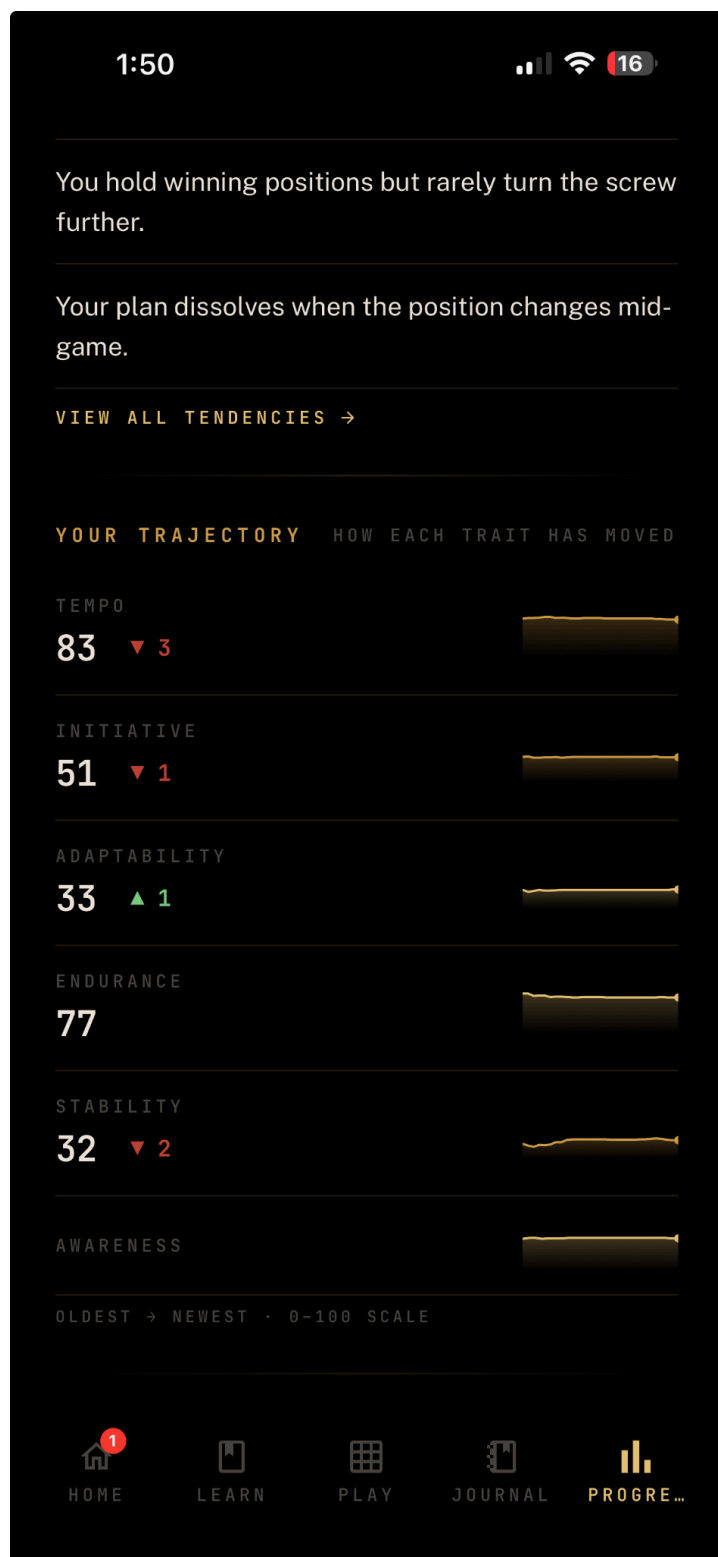

change the page title to:

"POISON PAWN® | Player Not A Piece"

Home Page

Logos need to be fixed- all need to be same size with actual logos in. grayscale isnt working for all. An example of a good logo is ucla but if theres multiple colors in a logo it cant all be one color

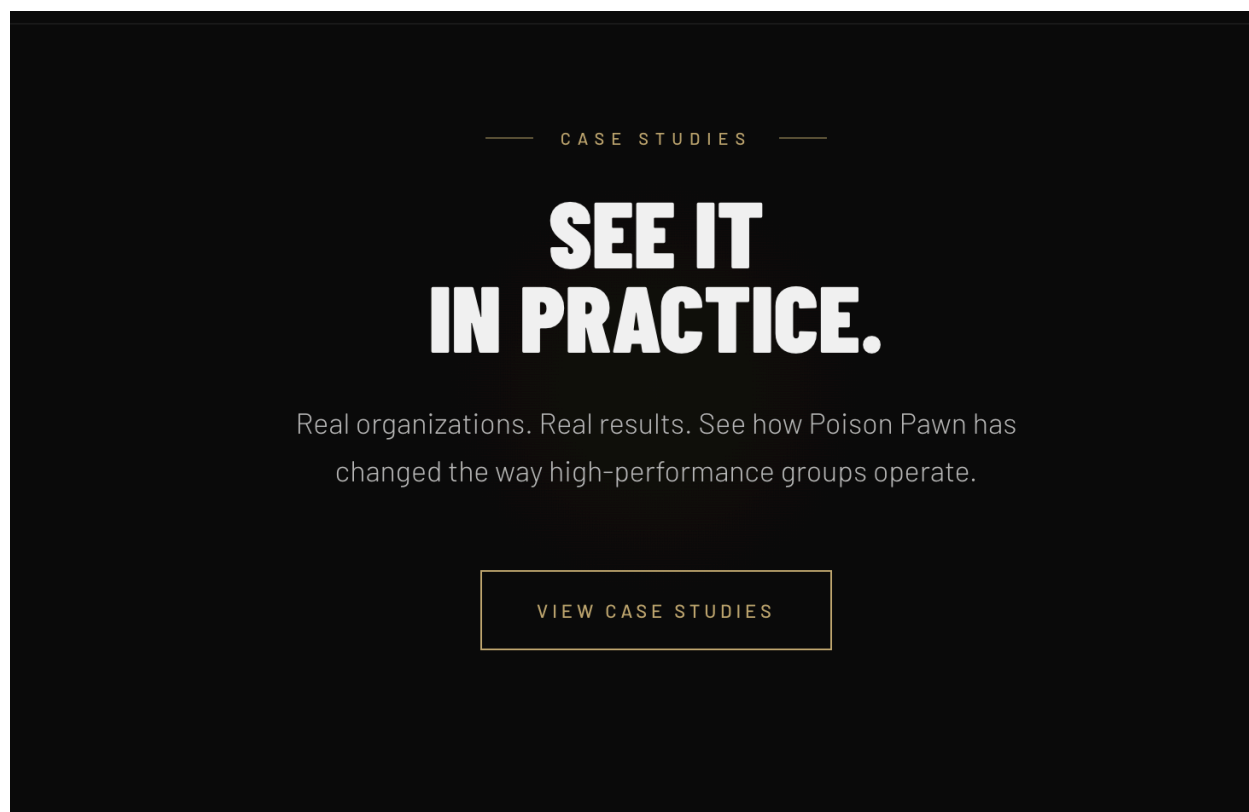

Current app photo on the home page needs to be replaced with this

CASE STUDIES

SEE IT IN PRACTICE.

take away the case studies here.

bottom page should look like this for how it works

Case Studies

Change case studies to collapse like how they were in ur original with an opportunity to read more on each.

The volleyball section is wrong please remove that video and instead add the info from the original html

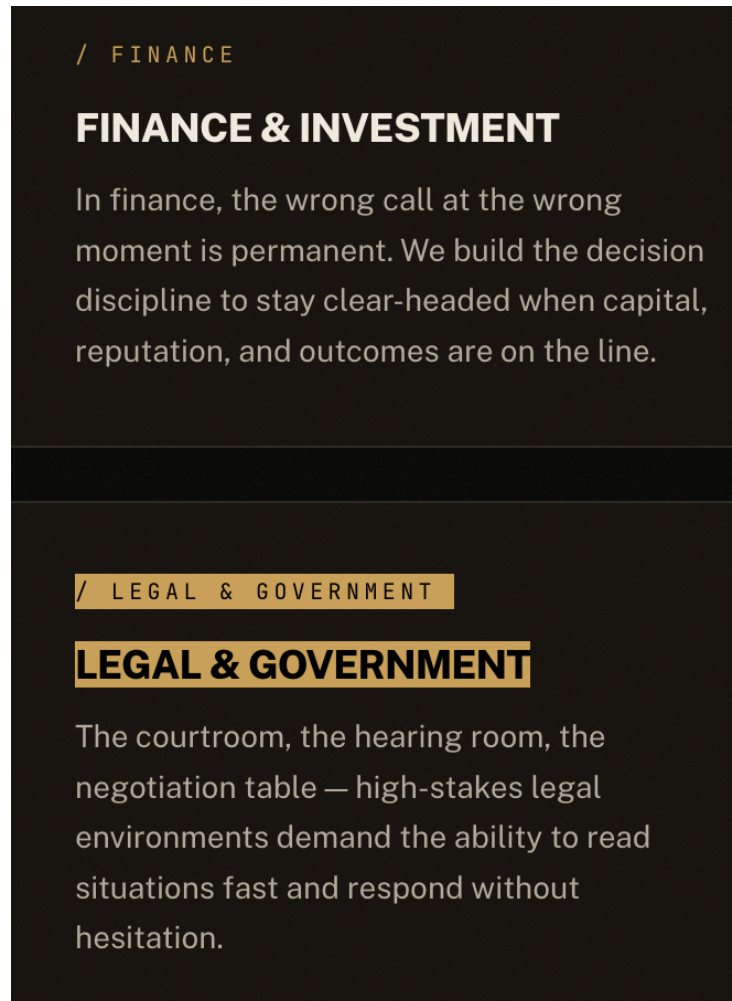

UCLA football player should be named- Dorian Thompson-Robinson

Also include a takeaway section for each case study and especially how for UCLA football they got the #3 QB in the country, Dante Moore.

The structure of all the case studies should match each other

Bring It To Your Team

The / ____ need to be changed to not match the exact heading as they do in these. The other sectors are fine. Take out elite from elite athletics though

Logo bar needs to stretch all the way out and still needs to be fixed

Take away apply for training cta from pricing.

Apply for Training

Remove the domain and Where do decisions matter most for you. Give a send button instead of the apply for training cta
